

Rahmat Ullah – Senior Software Engineer

☎: +92-3469070799 | ✉: rahmatul368@gmail.com | 📍 Lahore, Pakistan | [🌐 LinkedIn](#) | [📁 Portfolio](#)

Over 5 years of experience in software engineering, specializing in building scalable and high-performance applications using Laravel, PHP, and modern JavaScript frameworks like Vue.js and Nuxt.js. Proven track record of delivering robust solutions across eCommerce, healthcare, and project management systems, with hands-on experience in API integrations, system architecture, and performance optimization.

KEY SKILLS

PHP Laravel | Node.js | NestJS | Nuxt.js | Vue.js | RESTful APIs | Backend Architecture | API Integration | Payment Gateway Integration (Stripe, PayPal, Google Pay) | Linnworks & Microsoft Business Central Integrations | Authentication & Authorization | Performance Optimization | Prompt Engineering for Code Generation

TOOLS & TECHNOLOGIES

Version Control: Git, GitHub, Bitbucket | **CI/CD:** Pipelines & Automation | **Cloud Platforms:** AWS, Hostinger VPS | **Deployment:** Cloud Deployments | **Backend Tools:** Laravel Nova, Livewire | **Frontend:** Bootstrap, Tailwind CSS | **Databases:** MySQL, PostgreSQL, DB import/export, DB connection | **Operating Systems:** Windows, Linux | **Third Party Integrations:** Stripe, Paypal, Google Pay, Linnworks, Microsoft Business Central

PROFESSIONAL EXPERIENCE

Senior Software Engineer | DeltaDots

Lahore, Pakistan | Nov, 2023 – Present

- Led full-stack development of multiple large-scale applications using Laravel, Nuxt.js, Vue.js, and Node.js (NestJS) across healthcare, eCommerce, and enterprise systems.
- Built and maintained KP Pharma, a complex healthcare eCommerce and automation system with HL7-based integrations and pharmacy workflows.
- Developed RPM (Reliable Premium Management) system handling structured business processes, APIs, and admin functionalities.
- Worked on Festa App backend APIs using NestJS, ensuring scalable architecture and clean modular design.
- Developed Vue.js-based admin panels for managing system operations, users, and business workflows.
- Designed and implemented RESTful APIs, authentication systems, and role-based access control across multiple platforms.
- Integrated third-party services and automated business workflows to improve operational efficiency.
- Optimized application performance through query optimization, caching strategies (Redis), and architecture improvements.
- Managed database design and operations using MySQL and PostgreSQL for scalable systems.
- Collaborated with cross-functional teams including product managers and designers in Agile environments.
- Ensured smooth deployments and maintained CI/CD pipelines for multiple production systems.
- Acted as a key contributor in system design decisions, code reviews, and architectural improvements.

Associate Software Engineer | OnyxTec Solutions

Lahore, Pakistan | Aug, 2022 – Oct, 2023

- Contributed to the development of a monolithic web application using Laravel and Vue.js for a social platform designed for psychology students.
- Worked as part of a development team to build and enhance features for ILRC management system.
- Contributed to the development of Divinity Metals eCommerce platform, including product, order, and admin modules.
- Assisted in designing and implementing RESTful APIs and backend services using Laravel.
- Worked on frontend components using Vue.js to deliver responsive and user-friendly interfaces.
- Participated in database design and optimization using MySQL.
- Implemented authentication and role-based access control features.

- Collaborated with team members in an agile environment for feature development and bug fixing.
- Involved in testing, debugging, and improving application performance and stability.

Junior Software Engineer | Edenspell Technologies

Rawalpindi, Pakistan | Jan, 2021 – Jul, 2022

- Worked as a Junior Software Engineer (Laravel Developer) under senior developers, contributing to multiple web development projects.
- Assisted in developing eCommerce applications using Laravel, focusing on backend functionality and API integration.
- Contributed to the development and maintenance of Galaxy Academy website, ensuring smooth functionality and UI improvements.
- Worked on a funnel-based marketing project using Core PHP with dynamic form flows and lead handling logic.
- Developed and maintained features using Core PHP, Laravel, JavaScript, jQuery, and AJAX.
- Implemented dynamic UI interactions and asynchronous requests using AJAX and vanilla JavaScript.
- Participated in bug fixing, debugging, and improving existing codebase under senior guidance.
- Gained hands-on experience in full web development lifecycle including development, testing, and deployment.

KEY PROJECTS

PropQA - <https://propqa.ai/>

AI-powered real estate analytics platform designed to provide property insights and data-driven decision-making tools. Contributed to backend APIs and frontend modules using Laravel and Nuxt.js for analytics and property workflows.

KP Pharma - <https://kp-pharma.co.uk/>

A pharmaceutical eCommerce and testing automation platform for managing medical products, orders, and operational workflows. Integrated Microsoft Business Central and Linnworks APIs with Laravel to automate inventory, order processing, and business operations. Also implemented payment gateway integrations including Stripe, PayPal, and Google Pay for secure transactions.

Divinity Metals - <https://www.divinitymetals.com/>

ECommerce platform for metals trading and product management with admin and order handling modules. Contributed to backend development, product management features, and admin panel functionalities using Laravel and Vue.js.

CareQuorum - <https://carequorum.com/>

A monolithic web application built with Laravel, Blade, and Vue.js for psychology students to share content and engage in academic discussions. Contributed to backend logic, Blade-based UI rendering, and Vue.js components within a monolithic Laravel architecture.

ILRC – Immigrant Legal Resource Center - <https://www.ilrc.org/>

Legal resource management system for structured content handling and administrative workflows. Contributed to backend modules, admin functionalities, and system enhancements in a team environment.

Galaxy Academy - <https://www.galaxyacademy.net/en/>

Educational platform providing academic content and learning resources for students. Worked on feature development using Core PHP, Laravel, AJAX, jQuery, and frontend improvements.

StackConvert - <https://stackconvert.com/>

A personal full-stack utility platform built using Nuxt.js and Node.js for code and data conversions.

Designed and developed end-to-end, including frontend UI, backend services, and core conversion logic for multiple developer utility tools.

EDUCATION

- **BS Hons in Computer Science** | Abbottabad University of Science and Technology 2016-2020
- **FSC in Pre-Engineering** | Board of Intermediate and Secondary Education Abbottabad 2014-2016
- **Matriculation** | Board of Intermediate and Secondary Education Mardan 2013
